

# Information Security Consultants, Inc.

## Digital Forensics Benefits

**Know More Facts** — With a thorough and diligent forensic search you will know more about your case, your client and others who are pivotal to the outcome.

**Influence Decisions on How to Proceed** — With an early forensic investigation you will have a more complete picture of your case. You will be able to be more proactive and create a better strategy of how to proceed. This can save you many hours and help you achieve more favorable results.

**Out Maneuver Your Opposition** — With more facts from more places you will have the ability to out maneuver your opposition.

**Get Better Offers** — By having a complete knowledge of the facts, you can obtain more favorable settlements for your clients.

**Win More Trials** — The more facts you have, the better you can strategize and the greater chance you have of winning.

Thoroughness of forensic work that makes you look good and serves your clients well.

**Maximization of Resources** — Working with Information Security Consultants will give you additional staff, knowledge and work product to add to your own. This will result in a significant increase of capacity and productivity for your practice.

**Gain More of the Market Share** — Having these additional resources will give you an informational advantage that you can market to prospective clients. This will give you more leverage to confirm yourself as the expert who they can depend upon and allow you to gain the ideal clients.

**Greater Profits** — With more time, you can serve more clients and focus on building your practice, which will, in turn, create greater profit.

## Security Program Benefits

**Increase Company Stability** — During these tough economic times the risks to your company increase daily. Already 20% of companies with computers are reporting increased internal theft of data, most of it by trusted employees. This will increase as the recession deepens.

**Increased Competitive Advantage** — Your security posture will stand out in the marketplace and can become a strategic selling point.

**Demonstrated Due Diligence** — Numerous new regulations have made compliance issues more complex. Your security plan will address these issues in a systematic way.

**Promote Industry and National Security** — It's more than your own business at stake. An unsecured IT system can become a weapon in the service of an enemy or competitor.

**Improve IT Reliability** — By replacing ad-hoc software maintenance with planned and optimized procedures, reliability improves and unexpected downtime becomes less frequent. Functions like voicemail and e-mail become more reliable.

**Reduce IT Costs** — Optimization of IT infrastructure for security purposes leads to streamlined operations and reduced costs. Good Security is an investment that always pays for itself.

**Eliminate Confusion** — Security policy and procedures provide clear answers to many questions which crop up in daily operations, reducing confusion and increasing productivity.

**Reduce Employee Errors and Crime** — A complete safe hiring program reduces the most expensive mistakes that any business can make and its ongoing review serves as a deterrence to some major problems.
